# SEELEVEL™

Truck Gauge Programmer
Model 817-USB

The **SEELEVEL**™ 817-USB Truck Gauge Programmer is used to program tank calibrations and alarms and to troubleshoot any **SEELEVEL**™ 800 series systems. The USB interface allows tank calibration files to be created and stored on a PC computer.

817-USB Features

- Convenient **hand-held aluminum enclosure** helps to avoid errors due to interference and static electricity.

- The **USB port** allows tank calibration to be created and stored on a PC computer.

- Includes 32 memory locations for storing calibration charts and can be labeled for easy reference.

- Operates on four **ordinary alkaline AA's batteries,** field replaceable with no memory loss.

- Display is backlit for **easier viewing**. Can be turned on or off when needed to conserve the batteries.

- New software format is easy to read and is backwards compatible to the previous 817 model.

SEELEVEL™ 817-USB Benefits

Cost Effective Productivity

The use of an on-site SEELEVEL™ 817-USB Truck Gauge Programmer **eliminates downtime** waiting for factory calibration parts and allows easy reprogramming whenever the need arises.

The programmer also **reduces battery drainage** with an auto power-off feature after a period of no activity, saving additional energy in the field.

The programmer uses a transistor rather than a relay to **increase current capability**, eliminating sparking, and gauging battery power drain.

Simplify Installation

Simplify calibration to read values in either inches or user-defined volumes such as cubic meters or barrels. Also program offset values for different sender bar lengths, and configure alarm settings.

Software enables **easy loading and saving of calibration charts** on a PC and to transfer from a spreadsheet to the 817-USB programmer.

Able to copy from one SEELEVEL™ gauge display to another. Copy feature includes and extra entry step to **avoid accidental erasure** of calibration programs.

Diagnostic capability to test the sender bars and displays, and measure optical power.

Easy to Operate

The programmer is designed to be easily operated by those who are unfamiliar with electronics or computers.

Service and Warranty

Our professional and knowledgeable technicians are on-call to assist you with any problems you may encounter. This product offers a **three-year** limited warranty.
